

Cancer Scammers?

Eustace Mullins wrote an expose of what he called “the Medical Conspiracy Against America” in his book entitled, [Murder By Injection.](#) Read it.

October is Breast Cancer Awareness Month. Should we rename October Scam Awareness Month? [Some people think so.](#) The myriad of foundations hustling money for cancers of all types are too numerous to count. What do they really do with that money? Let’s look at just one.

Cancer is big business. Really big. Let’s see what the Susan G Komen Breast Cancer Foundation [spends](#) just on salaries. They spent 24 million dollars just in 2014. That’s a lot of cash for *research*. I see they donate to [planned parenthood](#). PP doesn’t do [mammograms](#). But they do millions of abortions. That is one way to prevent breast cancer. It is also a way to meet one of the goals of UN Agenda 21 aka Agenda 2030: decreasing the world’s population.
