

FOLLOW THE MONEY

If you "follow the money", you'll find out who controls the world.

Who controls THE MONEY?

Mayer Amschel Rothschild (1744-1812) founder of the Rothschild banking dynasty said, "Give me control of a nation's money and I care not who makes the

laws.”

So what does that control entail? How much power does one derive from being able to print money out of thin air? What does usury mean? Who owns the Federal Reserve Bank System? How much control do they have? Does the control of money impact the world?

Money creates power and power allows one to bribe anyone they need to do their bidding.

Sure there are thousands of useful idiots across the globe helping to implement UN Agenda 21, however none of them have the ability to set the stage for world domination. Only the people who control the money have the power to do that. All roads lead to the

same handful of people who *without* their ability to control the money supply, would have no power to advance their agenda. Their agenda is implemented via their control of: The United Nations, The World Bank, The IMF, The BIS, The Federal Reserve Bank System (U.S. central bank) and all other nation's central banks except for a couple Muslim Nations. Syria, Iran and perhaps a couple others do not yet have a Rothschild controlled central bank, but they're working on it.
