

UN AGENDA 21 MAPS

The above map courtesy of Dr. Michael Coffman

UN Agenda 21 Maps

Maps that illustrate how UN Agenda 21 aka Agenda 2030 is implemented can be found in many places. The links to maps, many found **WITHIN** the documents below

are just a sampling of what is available, IF you take the time to search for them.

All kinds of maps are contained within the “*development plans*” for where you live. All areas have these “*development plans*” which are also called by different names including: comprehensive plan, growth plan, land use plan, visioning 2035, visioning 2020, metro vision 2030, etc.

If you are having problems finding maps for your area contact me, and I will help you.

To readily illustrate what kinds of things can happen to you *and your private property* look at the following example from Roswell,

Georgia, USA:

Read [this petition](#) for now deceased Andrew Wordes who lived in Roswell, Georgia to get an idea of the type of harassment you will eventually encounter as the implementation of Agenda 21 continues via your *development plan aka comprehensive plan*.

[This](#) is the Roswell, Georgia “development plan referred to as “comprehensive plan” which is to be accomplished by 2030. Take note of how the city lists Andrew and his neighbor’s homes on the ‘Roswell 2030 Plan’ as a *green space and parks area*. In other words, Andrew’s and his neighbor’s homes were to be destroyed and replaced by open space.

Do you see your home on your

towns comprehensive plan? Not only can your property be taken from you, but the quality of life in your neighborhood can drastically change. To see an example of this look at [this video](#) and read the [article](#) that accompanies this video [here](#).

Here is a glossary of some terms used in development planning. Many of the terms you will read in your plan really mean something other than what you think they mean.

<http://www.keepourrights.org/glossary.htm>

To find maps for your area do the following:

**Google the terms
“comprehensive plan and your town”**

or “development plan and your town”
or “comprehensive plan and your
city, county” or province
or country.

Google “transportation
plans and your town or county, or
country” or “2050 and your town,
county or city, etc.” or “visioning
and your area” and you will find
maps included in documents.

Try googling “smart growth
and your town” or your county, or
your state, or your province or
your country “. Try googling
“sustainable cities 2025 and your
area”. Or insert “2030”.

Try googling terms like:
“sustainability and your area” or
“vision 2030 and the name of your
town”. Try “land use map and your

town” or county, etc” or “comprehensive plan and your town, county” etc. Try “transportation plans and your county, state, province etc.” Try “open space maps and your area”. Try “ zoning overlay maps and your town”, county etc.”

In the US, each state has a department of environmental conservation. Try looking at their websites for maps. (I am sure all countries have something similar.)

***Any* of the terms that denote UN Agenda 21 can be used to search for maps.**

Here are some more terms to search for maps: combine the terms:

“maps and UN Agenda 21” or “maps and sustainable development”

or “maps and Utility service areas” or “maps” and any of the following terms:”Urban Growth Boundaries, or wildlands project or Biospheres, or Global warming or transition town, or visioning or ICLEI, or Sustainable Development or Smart Growth or Form-Based Zoning or Green Energy Mandates or Carbon Offsets or Cap and Trade or Local Agenda 21 or Livable communities or UN Framework Convention on Climate Change or the Conventions on Biodiversity or UN Environment Programme or UN-HABITAT or American Planning Association, etc.

Take a look at the *any* of the so-called “**Green**” *groups* that put together maps such as : Sierra Club, The Nature Conservancy,

Greenbelt Alliance, 1000 friends of Oregon, 10000 friends of Pennsylvania, (I noticed there are several groups that call themselves "1000 or 10000 friends of"... google the "name of your area and friends of" and you might find one of these groups in your area too.

You will find they have created documents with all kinds of maps in them. Google the "*group name and maps*" and you will be amazed at what pops up.

[wildlands map](#) There are several maps found here. LOOK AT THIS MAP

Priority Preservation Area

Rural Cluster Subdivisions

“most protective” “effective zoning” means being *stricter than one dwelling unit per 20 acres* which means: that you MUST have at least 20 acres before you can build your home or if you own 20 acres and you decided you wanted to sell off 10 acres to build some houses and make some money off YOUR land, you would not be allowed to do that, which essentially makes your land worthless.

San Diego Regional Planning Commission geographic boundary viewer This is from San Diego. This map has several overlay features which allows you to “drill down”
.
